LIGHTING WITHOUT LIMITS

Selecting the colour and texture of a luminaire is an important choice. Whether it's feature lighting that needs to make an impact, or functional lighting that should blend into the surroundings, the interaction of light on a surface is paramount to the design of a space.

Optelma has a wide range of finishes available, including RAL colours, colour anodised aluminium, and the new architectural finish range, which comprises woodgrains, textiles, contemporary materials and many other unique options.
